

Integrated Drug Discovery Services

Discovery services spanning the entire journey from target ID and validation to IND

As a leading contract research organization in India, Sai Life Sciences delivers integrated discovery services spanning synthetic and medicinal chemistry, biology, DMPK and toxicology to a global client base across diverse therapeutic areas. If you are looking to reduce the time to clinic for your drug candidate, do get in touch!

Highlights

- 170+ Discovery programs completed
- Diverse customer profile biotechs, small, mid & large pharma
- Enduring client relationships averaging 10+ years
- 35+ programs advanced to IND or Ph I/II/III
- 18 months average turnaround time from HIT/Lead to Candidate

Capabilities

- Target ID & Validation
- Hit identification
- Synthetic & Medicinal Chemistry
- Biology
- DMPK
- Toxicology
- *In vivo* Pharmacology
- Computational Chemistry

Why Choose Sai?

- Global footprint – Exploratory Biology Lab in Boston, Integrated Discovery & Development Campus in Hyderabad, and Process Labs in Manchester, UK
- Focus on rapid turnaround time and shorter decision-making cycles
- Unified program management and transparent communications
- Experienced and dedicated scientific team
- Custom labs and fit-for-purpose integrated teams
- Customizable collaborations

Therapy focus

- Oncology
- CNS
- Inflammation
- Autoimmune
- Anti-infectives
- Cardiovascular
- Metabolic Disorders
- Pain, Rare diseases and more

Progressive growth from a discovery chemistry provider to an integrated discovery partner
